

We reduced our emissions by 10% in 2017. Well ahead of our 3% target!

Our CO₂ footprint for 2017

We looked at some of the great initiatives the UKI Infrastructure and Compliance Team have put in place this year to reduce our emissions.

Five new vehicles added to fleet that are Euro 6 compliant

Utilizing renewable energy across three sites

70% recycled card used in all packing materials

100% of record destructions turned into toilet paper.

Used telematics software to increase our average fleet MPG from 27 to 30

99% of all general waste recycled

All new warehouse and office space to be built with PIR controlled LED lighting
